

NEW ENGLAND STOP & SHOP UNITY BARGAINING UPDATE

On January 21st, your bargaining team returned to the table for another round of negotiations for your 2026 Stop & Shop contract.

Today's discussions were on a variety of topics including the meatcutter apprenticeship program and potential impacts of AI and new technology in the workplace, all of which move us closer to securing the increases and benefits that reflect your hard work.

We will meet with the company again on February 11th and 12th and remain committed to delivering a fair, equitable, and timely contract that addresses the issues that matter most to you and your co-workers:

- **Meaningful wage increases that keep up with the rising cost of living.**
- **Securing the employer contributions necessary to maintain the high quality and affordable benefits of your health and welfare fund.**
- **Addressing staffing levels to ensure safe and sustainable working conditions.**
